

Hello! I am going to  
teach you how to clean  
white sneakers!

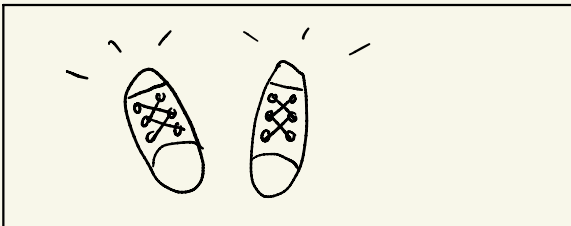

You'll need shoes, a towel, a  
brush, dish soap, warm water,  
washcloth, and paper towel. Let's start!

After the shoes are cleaned,  
we can leave them outside to  
dry.

Let's use the leftover solution  
to soak the shoelaces.

Shoes look much cleaner  
after left to dry!
